PAPER QUILLING PROJECTS

“Quilling or paper filigree is an art form that involves the use of strips of paper that are rolled, shaped, and glued together to create decorative designs. The paper is rolled, looped, curled, twisted and otherwise manipulated to create shapes which make up designs to decorate greetings cards, pictures, boxes, eggs, and to make models, jewellery, mobiles etc. The most popular and versatile technique is that of rolling. The paper strip is rolled in fingers or using a tool called a quilling needle. The coil is then released and then glued at the tip and then shaped. These shaped coils are arranged to form flowers, leaves, and various ornamental patterns.”

AMPLIFIER POSTER PROJECTS

With Artist Statement

If your imaginary community that you live in was given a chance to determine for themselves how to restore and rebuild their culture, what actions will you take to restore the community?

- What changes do you think need to happen to improve the lives of the people in your community?
- Which key Indigenous values will help you achieve this?
- How could you emphasize these values, and what steps would you take to create the change you want?
- What are the impacts on human lives, the land, biodiversity, and air and water quality when we restore land stewardship to Indigenous Peoples?

What is the meaning of *amplify*?

1 : to expand (something, such as a statement) by the use of detail or illustration or by closer analysis.

2a : to make larger or greater (as in amount, importance, or intensity) : increase. b : to increase the strength or amount of especially : to make louder.

Luca's Amplifier Poster

Title of Art Piece: A Reminder

A reminder to everyone that our waters are sacred and if we continue polluting it will just get worse. My inspiration came when I was on a nature walk along the river, I was disgusted to see how much trash was in the river, tires and plastic water bottles everywhere and I even found a rusty old stop sign.

Everett's Amplifier Poster

People who go fishing will find garbage or get fish that are unhealthy. Garbage and debris will ruin the water and the health of fish. Intergenerational Knowledge will help tell kids that the water is polluted and ways to restore it. They need to recycle more and stop throwing garbage away. They need to stop wasting so much.

Grace's Amplifier Poster

The name of this piece is still a work in progress. I think using paint suited this kind of art. In this piece I showed the residential school but after they closed it so the windows are boarded up to show they closed them and people don't attend them anymore. But I put a bunch of grave stones to show that it really impacted people and that so many people died. I like making art like this to show things going on in the world and to make somewhat of an impact and show that this is what happens when we try to force people into your culture. Yes the schools did close but it's not all fixed and so many people died because of it.

Ray's Amplifier Poster

I chose to amplify the need for change in the world. This piece speaks to the disconnection we have with each other and the land. The Haudenosaunee have the oldest living democracy in the world. Their cultural values could be a real chance for the world. Eya:doni
